ABOUT ME

Full-stack software developer with 3+ years of experience building web, mobile, and desktop applications from the ground up. I like working across the whole stack — shaping the user-facing experience just as much as the APIs and logic behind it, across whatever platform the product needs. I work closely with designers and product folks to turn ideas into something that actually works well in production.

SKILLS

HTML / CSS / JavaScript / TypeScript / Frontend - (React Js, React Native) / NodeJs (ExpressJs) / Vue.js (2 &3) / Electron Js / RESTful api / Github / Git

WORK EXPERIENCE

🏢 **Vir Softech Pvt Ltd** – Noida, India

Senior Software engineer

[01/04/2026 – Current]

- Involved in system architecture and technical decisions across 4+ full-stack web and desktop products, working alongside the team on code reviews to keep quality consistent.
- Mentoring a team of 3 junior engineers, pairing with them on real project work and giving structured feedback as they ramp up.
- Working on CI/CD pipeline improvements across GitHub Actions and GitLab CI to help the team deploy faster and more reliably.

🏢 **Vir Softech Pvt Ltd** – Noida, India

Software engineer

[01/05/2023 – 31/03/2026]

- Built and maintained full-stack web and desktop applications with React.js, Vue.js, Node.js, and Electron.js, supporting a high-concurrency user base with fast, reliable API performance.
- Designed RESTful APIs with Fastify and Express.js, handling authentication and access control for systems that went through recurring third-party security audits.
- Worked on a healthcare platform, rebuilding admin workflows in React.js and Node.js to speed up processing while keeping patient data handling compliant with security standards.
- Contributed to an e-commerce platform, refactoring checkout flows in TypeScript and React.js to reduce drop-off and improve conversion rates.
- Built enterprise licensing and approval tooling for a printing industry client using Node.js, automating manual steps in their workflow.
- Rebuilt data-sync modules in React Native, improving sync reliability and reducing crashes across iOS and Android.
- Delivered cross-platform desktop applications with Electron.js and Vue.js, adding real-time data updates and local system integration for enterprise clients.
- Set up CI/CD pipelines and reusable component libraries to help the team ship faster with fewer production issues.

EDUCATION AND TRAINING

Full Stack Web Developer

Masai School [01/02/2022 – 30/01/2023]

City: Bangalore | Country: India | Website: <https://www.masaischool.com/>

B Tech - Mechanical

R C Patel Institute of Technology [01/07/2017 – 25/09/2021]

City: Shirpur | Country: India | Website: <https://www.rcpit.ac.in/>
